

Getting Vaccinated

A Visual Resource Guide

Division of Developmental and Behavioral Pediatrics & University of Cincinnati Center for Excellence in Developmental Disabilities Cincinnati Children's Hospital Medical Center

Being sick is challenging. It can affect your daily life, like going to work, school, or meeting with others. Sometimes, it can be serious. Especially if germs are spread to others.

Luckily, scientists created *vaccines* that can keep us healthy and safe.

A vaccine is a specific kind of medicine that helps your body build *immunity* which helps fight against illness or disease. PAGE 3

You might hear others talking about the COVID-19 vaccine, the Flu vaccine, and other vaccines.

Let's see what happens when people get a *vaccine*...

Where and How to Schedule a Vaccine Appointment

This Photo by Unknown Author is licensed under <u>CC BY-SA-NC</u>

There are many places where you can schedule an appointment for the COVID-19 and other vaccines.

You can call your doctor's office, nurse, or clinic to schedule an appointment.

This Photo by Unknown Author is licensed under <u>CC BY-ND</u>

You can call a pharmacy close to where you live to schedule an appointment.

Another option is the pharmacy at a supermarket or a "Little Clinic" at the supermarket.

This Photo by Unknown Author is licensed under CC BY-SA-NC

This Photo by Unknown Author is licensed under CC BY-NC-ND

You can call your health insurance provider, like Medicaid, to help you, too.

You can also check with your local health department about vaccine clinics in your area.

<u>Ehis Photo</u> by Unknown Author is licensed under <u>CC BY-NC-ND</u>

If you are a Veteran, the Veterans Affairs (VA) System will provide a COVID-19 vaccine for you.

Sometimes, you will need to go online on a computer to schedule your appointments.

This Photo by Unknown Author is licensed under CC BY-NC

When you schedule your vaccine appointment, make sure you ask if you need one shot, two shots, or more.

Sometimes, you schedule all of your vaccine appointments at the same time.

Other times, you may schedule your follow-up shot(s) after you received your first shot.

What Happens When You Get the Vaccine

Most vaccines are given by *injection,* also known as a shot.

This means the nurse or pharmacist will use a small needle to put the medicine in your arm.

Before your shot, the nurse or pharmacist will clean your arm with a cotton ball or wipe.

Sometimes the wipe feels cold and wet, but it does not hurt.

A shot has a small needle. Some people are uneasy about shots.

It's normal to be nervous or anxious.

Tips to help when getting a shot:

- Squeeze someone's hand.
- Look away.
- Distract yourself with something, like listening to music, playing a game on your phone, or clicking a pen.
- Take 5 deep breaths.
- Slowly count to 10.

The nurse or pharmacist will give you the shot.

This happens quickly and feels like a pinch.

This Photo by Unknown Author is licensed under CC BY-NC-ND

You may have to wait for 15 or 20 minutes after you received your shot.

The doctor, pharmacist, or nurse wants to make sure that you feel fine after you got your shot.

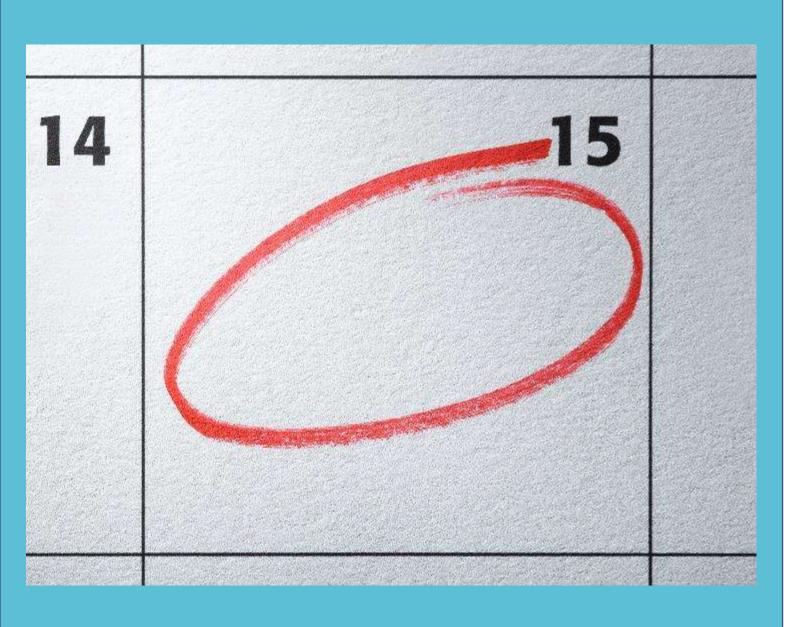

Bring something with you to distract you while you wait, like a game on a device, your phone, a magazine, or a fidget.

Sometimes, you will need more than one shot for your vaccine to work best.

Other times, you will need the same shot each year.

Recommended Adult Immunization Schedule for ages 19 years or older

How to use the adult immunization schedule

Determine recommended vaccinations by age (Table 1)

Assess need 🚄 for additional recommended vaccinations by medical condition or other indication 3 Review vaccine Review contraindications types, frequencies, and precautions intervals, and considerations for for vaccine types special situations (Appendix) (Notes)

Vaccines in the Adult Immunization Schedule*

(Table 2)

Vaccine	Abbreviation(s)	Trade name(s)
Haemophilus influenzae type b vaccine	HID	ActHIB° Hiberix* PedvaxHIB°
Hepatitis A vaccine	НерА	Havrix* Vaqta*
Hepatitis A and hepatitis B vaccine	НерА-НерВ	Twintix®
Hepatitis B vaccine	Нерв	Engerix-8° Recombivax H8° Heplisav-8°
Human papillomavirus vaccine	HPV	Gardasil 9°
Influenza vaccine (inactivated)	IIV4	Many brands
Influenza vaccine (live, attenuated)	LAIV4	FluMist [®] Quadrivalent
influenza vaccine (recombinant)	RIV4	Flublok® Quadrivalent
Measles, mumps, and rubella vaccine	MMR	M-M-RII*
Meningococcal serogroups A, C, W, Y vaccine	MenACWY-D MenACWY-CRM MenACWY-TT	Menactra* Menveo* MenQuadfi*
Meningococcal serogroup B vaccine	MenB-4C MenB-FHbp	Beisero* Trumenba*
Pneumococcal 15-valent conjugate vaccine	PCV15	Vaxneuvance™
Pneumococcal 20-valent conjugate vaccine	PCV20	Prevnar 20™
Pneumococcal 23-valent polysaccharide vaccine	PPSV23	Pneumovax 23*
Tetanus and cliphtheria toxolds	Td	Tenivac® Tdvax™
Tetanus and cliphtheria toxoids and acellular pertussis vaccine	Tdap	Adacel® Boostrbr®
Varicella vaccine	VAR	Varivax*
Zoster vaccine, recombinant	RZV	Shingth

*Administer recommended vaccines if vaccination history is incomplete or unknown. Do not restart or add doses to vaccine series if there are extended intervals between doses. The use of trade names is for identification purposes only and does not imply endorsement by the ACIP or CDC.

Recommended by the Advisory Committee on Immunization Practices (www.cdc.gov/vaccines/acip) and approved by the Centers for Disease Control and Prevention (www.cdc.gov), American College of Physicians (www.acponline.org), American Academy of Family Physicians (www.aafp. org), American College of Obstetricians and Gynecologists (www.acog.org), American College of Nurse-Midwives (www.midwife.org), and American Academy of Physician Associates (www.aapa.org), and Society for Healthcare Epidemiology of America (www.shea-online.org),

Report

 Suspected cases of reportable vaccine-preventable diseases or outbreaks to the local or state health department Clinically significant postvaccination reactions to the Vaccine Adverse Event Reporting System at www.vaers.hhs.gov or 800-822-7967

Injury claims

All vaccines included in the adult immunization schedule except pneumococcal 23-valent polysaccharide (PPSV23) and zoster (RZV) vaccines are covered by the Vaccine Injury Compensation Program. Information on how to file a vaccine injury claim is available at www.hrsa.gov/vaccinecompensation.

Adults, just like children, also have an immunization schedule.

We will need vaccinations throughout our lives.

Here is a link to an adult vaccination schedule:

https://www.cdc.gov/vaccines/schedul es/downloads/adult/adult-combinedschedule.pdf

After getting a vaccine, some people have *side effects*.

This means that you may:

- Have a sore arm
- Feel tired
- Have a headache

This is normal and goes away after a couple of days.

These side effects let us know that the vaccine is starting to work.

When you are vaccinated and take certain precautions, you are keeping yourself and your community safe.

To stay healthy, it is also helpful to continue to wear your mask, wash your hands often, and avoid big crowds.

STOP THE SPREAD OF GERMS Help prevent the spread of respiratory diseases like COVID-19.

Stay at least 6 feet (about 2 arms' length) from other people.

6 ft

cdc.gov/coronavirus

CS319178 May 12, 20204:01 PM

Stop Germs! Wash Your Hands.

When?

- After using the bathroom
- · Before, during, and after preparing food
- · Before eating food
- · Before and after caring for someone at home who is sick with vomiting or diarrhea
- · After changing diapers or cleaning up a child who has used the toilet
- · After blowing your nose, coughing, or sneezing
- · After touching an animal, animal feed, or animal waste
- · After handling pet food or pet treats
- · After touching garbage

How?

LIFE IS BETTER WITH

Lather your hands by rubbing them together with the soap. Be sure to lather the backs of your hands, between your fingers, and under your nails.

Scrub your hands for at least 20 seconds. Need a timer? Hum the "Happy Birthday" song from beginning to end twice.

Dry hands using a clean towel or air dry them.

Rinse hands well under clean, running water.

8

Keeping hands clean

is one of the most Important things we can do to stop the spread of germs and stay healthy.

National Disability Information and Access Line (DIAL)

DIAL was created through a partnership between the Administration for Community Living (ACL) and the Centers for Disease Control and Prevention (CDC) to help older adults and people with disabilities get COVID-19 vaccines. It is run as a collaboration between USAging and a group of organizations serving people with disabilities, including:

 Association of Programs for Rural Independent Living (APRIL)

Association of University Centers on

Disabilities (AUCD)

- National Association of Councils on Developmental Disabilities (NACDD)
- National Council on Independent Living (NCIL)
 National Disabilities Rights Network (NDRN)
