

Sally Le Cras, PT, DPT, PCS earned a Master of Science in Physical Therapy in 1992 and Doctor of Physical Therapy from Arcadia University in 2013. She became Board-Certified as Clinical Specialist Pediatric Physical Therapy in 2008 and recertified in 2018. Sally is the Director of the Cincinnati Children's Pediatric Physical Therapy Residency Program and the LEND PT Core Faculty Member.

“I enjoy working directly with children and their families to reach their goals for improved function and quality of life. Part of my role as a physical therapist is to connect children and their caregivers with resources, specialists and programs throughout the medical center and community that aligns with their goals or addresses a concern they have. I am grateful for the opportunity to provide education and mentoring to the LEND Trainees as a member of the Faculty and to share my passion for providing the highest level of evidence based and family centered care to our patients and families.

I am able to pour a lot of energy into my professional life because of the love and support of my family – my thoughtful husband and two amazing sons. In my spare time, I enjoy walks, knitting and other crafts – I like to be creative!”
